

Barrel OxyFresh – Reclaiming and Cleaning Instructions

Reclaim Barrel:

1. Rinse barrel thoroughly to remove all gross soils and contaminants. Make limited use of a brush if necessary.
2. Fill barrel halfway with cool water and add 1/2 oz Barrel OxyFresh per 1 gallon capacity, e.g. for 30 gallon barrel use 15 oz of Barrel OxyFresh. Roll or rock barrel for 3 minutes to dissolve product.
3. Top up with cool water and roll barrel again. Bung loosely and allow the barrel to sit for 24 hours.
4. Empty the barrel and rinse the interior with water thoroughly.
5. Fill barrel halfway with water and add 1 oz citric acid per 5 gallons capacity, e.g., for 30 gallon barrel use 6 oz citric acid. Roll barrel for about 3 minutes to dissolve acid.
6. Top up with cool water and roll barrel again. Bung and allow barrel to sit for 6 hours.
7. Empty the barrel and rinse interior thoroughly.

Clean Barrel

1. Rinse barrel thoroughly to remove all gross soils and contaminants. Make limited use of a brush if necessary.
2. Fill barrel halfway with cool water and add 1 oz Barrel OxyFresh per 5 gallons capacity, e.g. for 30 gallon barrel use 6 oz of Barrel OxyFresh. Roll or rock barrel for 3 minutes to dissolve product.
